

CHLOROPHYLL+

Nature's First Gift for Wellness

Since the beginning of time, green has symbolized life. That "green" is chlorophyll, the substance responsible for harnessing the energy of the sun through photosynthesis.

Chlorophyll in plants performs metabolic functions such as respiration and growth. The chlorophyll molecule is chemically similar to human blood.

Liquid chlorophyll is highly valued for its ability to support blood oxygenation and for cleansing the liver and blood.*

ID # 11006

Unique Qualities of Eniva Chlorophyll+

Mulberry Leaves

The mulberry plant and leaves are well documented in clinical research for having multiple health benefits including helping to support healthy sugar levels, healthy cellular replication, body cleansing and membrane stability.*

Paraben Free!

Recent discoveries of the estrogenic effects of certain synthetic chemicals, such as parabens, on the endocrine system of humans and wildlife is of growing concern. Parabens may affect testicular and prostate health in young boys, as well as breast and uterine health in women.* **Eniva liquid chlorophyll is paraben free.**

Supplement Facts

Serving Size: 1 Teaspoon (5mL)
Servings Per Container: 96

	Amount Per Serving	% Daily Value
Chlorophyll Complex	50 mg	*
Body Conditioning & Purifying Blend	200 mg	*
• L-Glutamine		*
