

PROBIOTIC+

Health Begins in Your Gut

The health of your digestive system has a significant impact on your body's wellbeing.* The bacteria that live in your intestines play a big role in that healthy state. Bacteria are a large and diverse population, and can change depending on age, diet, medical conditions and the use of supplements. When the overall flora of the intestines is changed and the amount of healthy bacteria is reduced, the body goes out of balance.

Probiotic bacteria help balance the flora, out-compete the growth of harmful bacteria, and support the body's digestive, immune and nutritional functions. People with flourishing, properly balance bacterial colonies are well-equipped to fight the growth of harmful bacteria.*

The Eniva Health Probiotic+ is formulated to offer an outstanding health experience:

- Contains a potent serving of 50 billion CFUs
- Provides 10 strains of probiotic impact
- It's delivered in a Patented Release Capsule which protects it while traveling through stomach acid, until the capsule can reach the intestines, its ideal location for release.
- Contains FOS and patented Sunfiber® prebiotics, substances that promote the growth and activity of the probiotics.
- Specialized bottle helps retain potency of formula, eliminating the need to refrigerate.
- It is Soy-free, Gluten-free, Dairy-free, with no Wheat or Eggs, Zero Sugar, and no artificial colors or flavors.

Eniva Health Probiotic+ is a vital part of any nutritional program, helping support:

- Bowel Regularity*
- Immune Health*
- Nutrient Absorption*
- Intestinal and Colon Health*
- Comfort for mild, occasional GI distress*
- Gut flora balance*
