

CAL-MAG

Optimal Physical Conditioning

Calcium and magnesium play many critical roles, most importantly the support of strong and healthy bones. Cal-Mag works in a formulation of adenosine triphosphate, the key form of biologic energy.* Getting the correct balance of these important nutrients is critical for optimal physical functioning.

Eniva Cal-Mag combines these minerals in the correct ratio, approximately two parts magnesium to one part calcium so the body better absorbs and assimilates the calcium it needs. By having calcium and magnesium in one balanced solution, Eniva ensures that you'll deliver your body the maximum benefits from both minerals.

Cal-Mag Helps Support

Calcium helps support:

- Healthy bones*
- Occasional sleeplessness*
- Healthy gums and teeth*
- Premenstrual cycle*
- Stress management*
- Healthy muscles*
- Positive moods*
